Basically,  *pigment* is a highly concentrated loose, very vibrant color powder. There are many different companies that make them, they come in different color, texture, finishes,... and there's also many different ways that you can use them. Pigments can accentuate and enhance your make up and similarly ruin your whole look too, hence one must use pigments carefully and in the right way. You can use pigments as highlighting powder, bronzers, blush or contouring powder. How to use your pigments in full potential? Keep reading :)
Pigmenti su vrlo koncentriranih, živih boja i naj?eš?e dolaze u praškastoj teksturi. Postoji mnogo razli?itih tvrtki koje ih proizvode, dolaze u razli?itim bojama, teksturama, finišu,... a ono što ih toliko isti?e su upravo mnogi na?ini na koje ih se može koristiti. Pigmenti mogu istaknuti vaš makeup, odvesti ga u novu dimenziju, ali isto tako i potpuno uništiti kompletan make up stoga ih se treba koristiti pažljivo i na pravi na?in. Od pigmenata možete napraviti vlastiti bron?ani puder, rumenilo ili oslikavati u prahu. Zanima vas kako koristiti pigmente u punom potencijalu? Nastavite ?itati :)
